Clarkson University offers a Minor in Project Management, a field that entails managing people, resources, and budgets to ensure projects are completed on-time, on-budget, and within performance. The minor is:

- Open to all students in all majors and is useful for engineers, science and business majors.
- An opportunity for students to pursue certification through the Project Management Institute (PMI), a great resume item and source of value recognized by employers.
- An opportunity for certain students to sit for the American Society for Quality’s “Certified Quality Improvement Associate” exam.

To earn a Minor in Project Management, students must maintain a 2.0 average in the five (5) three-credit courses, distributed in the following fashion:
